

Jonnadula Mohit Sai

Software Engineer • Full-Stack Developer • Backend Engineer • AWS Certified
+91 9494366318 • mohitjonnadula16@gmail.com • [Linkedin](#) • [GitHub](#) • Nuzvid, Andhra Pradesh

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (2026) with 3 internships and a strong foundation in software engineering — backend systems, full-stack web development, REST API design, and cloud deployment on AWS. Experienced building scalable, production-grade applications with clean code, agile workflows, and cross-team collaboration. AWS Certified Cloud Practitioner. Immediate joiner seeking Software Engineer / SDE roles.

EXPERIENCE

Software Engineer Intern (Remote, Part-time)

Jan 2025 – Oct 2025

SSIT Solutions

- Designed, developed, and delivered a production Secure Exam Portal (MCQ + coding challenges, RBAC, real-time result processing) for an enterprise client — following a full SDLC from requirements to deployment.
- Engineered scalable REST APIs in Node.js/Express following OOP principles and clean code practices, achieving 20% reduction in server response time; wrote unit tests and participated in code reviews.
- Deployed fault-tolerant backend microservices on AWS EC2 and S3 with auto-scaling; implemented JWT authentication, role-based access control, and secure data handling best practices.

Python Developer Intern

May 2024 – Jul 2024

Edubot Technologies (Hybrid)

- Engineered and optimised Python scripts and data processing pipelines, applying strong problem-solving and debugging skills to reduce manual data-cleaning effort by 40%.
- Built modular, maintainable backend scripts handling real-time concurrent data streams in a live educational platform; followed coding standards and documented solutions thoroughly.

Web Development Intern

Jan 2024 – Mar 2024

Biztron Softech (On-site)

- Developed responsive, cross-browser web interfaces using HTML5, CSS3, and JavaScript following software engineering best practices; diagnosed and resolved critical frontend performance bottlenecks.

PROJECTS

Postit — Social Media Platform [\[GitHub\]](#) [\[Demo\]](#) | MongoDB · Express · React · Node.js · AWS · Redux · JWT

- Architected and built a full-stack social platform from scratch — designed RESTful API contracts, normalised MongoDB schemas, implemented JWT-based auth, and deployed on AWS with real-time feeds at sub-100ms latency.
- Applied OOP design patterns, wrote modular components with Redux state management, and ensured cross-browser compatibility — handling concurrent users reliably in production.

Secure Exam Portal System | Next.js · Node.js · PostgreSQL · RBAC · JWT

- Delivered a production client project at SSIT Solutions — engineered a multi-role exam management system (student, admin, examiner) with MCQ and coding challenge modules, real-time result processing, and secure RBAC.
- Implemented clean architecture separating business logic, data access, and API layers; enforced secure coding practices throughout the SDLC from design to production deployment.

Multi-Modal RAG Assistant — "Dual-Brain" [\[Demo\]](#) | Python · FastAPI · FAISS · LangChain · Docker

- Engineered a scalable AI backend system with a custom query routing engine, FAISS vector database, and FastAPI serving layer — focused on low-latency inference, fault tolerance, and clean API design.
- Reduced query latency by ~35% through context-aware chunking and vector indexing optimisation; deployed via Docker with a CI/CD pipeline for reliable production releases.

Edge AI Voice Assistant — "The Guardian" [\[Demo\]](#) | Python · ONNX Runtime · PyTorch · REST APIs

- Built an end-to-end offline voice processing pipeline — applied model quantisation and graph-level optimisation techniques to reduce inference latency by ~60%, enabling real-time performance on consumer hardware with no GPU.

TECHNICAL SKILLS

Languages & CS: Python, Java, C++, JavaScript ES6+, TypeScript, SQL — Data Structures, Algorithms, OOP, System Design, DBMS, OS

Backend & Cloud: Node.js, Express.js, FastAPI, REST APIs, Microservices, AWS (EC2, S3, Lambda), Docker, CI/CD, Git, Linux, Agile/Scrum

Frontend & DB: React.js, Next.js, Tailwind CSS, Redux, HTML5, CSS3, MongoDB, PostgreSQL, Firebase

AI / Tools: PyTorch, ONNX Runtime, LangChain, FAISS, Hugging Face, Whisper, NLP, Streamlit, Gradio

EDUCATION

B.Tech — Computer Science & Engineering

Lakireddy Balireddy College of Engineering, Vijayawada

CGPA: 8.07 / 10

2022 – 2026

Certifications: AWS Certified Cloud Practitioner (2024) • IBM Machine Learning • HarvardX Data Science

ACHIEVEMENTS

- Hackathon Winner — 24-hr Software Engineering Challenge, ranked #1 among all competing teams.
- Built and deployed 5+ full-stack and AI-powered applications in production with live demos and 10,000+ lines of original code.
